DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(c) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 14 April 2008 has been entered.
2. Claims 1-6, 8-12, and 14-19 have been presented for examination.
3. Claims 7 and 13 have been cancelled as per Applicant's request.

Response to Arguments

4. Applicant's arguments, see 8, filed 14 April 2008, with respect to claims 1-6, 8-12, and 14-19 have been fully considered and are persuasive. The prior art rejection of claims 1-6, 8-12, and 14-19 has been withdrawn.

Specification

5. The amendment filed 14 April 2008 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is illustrated in claims 14-19. The Specification fails to provide any support for implementing the invention using a machine-readable medium that comprises instructions.
6. Applicant is required to cancel the new matter in the reply to this Office Action.

7. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter of claims 14-19. The specification fails to provide any support for "a machine-readable medium stored on a computer memory, comprising instructions, which when implemented by a processor perform the following operations." See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Appropriate correction is required.

Claim Rejections - 35 USC § 112

8. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

9. Claims 14-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention. The specification fails to provide any indication that the invention can be implemented using a machine readable medium that comprises instructions. In fact, the specification only provides for a hardware implementation of the invention as illustrated by Figure 1. Therefore, one of ordinary skill in the art, at the time the application was filed, would not convey that the inventors had in their possession an embodiment of the invention that was implemented using machine readable medium comprising instructions.

Allowable Subject Matter

10. Claims 1-6 and 8-12 are allowed.

11. As per independent claims 1, 8 and 14, the record has shown that it would have been obvious to add randomization to Barrett's method in order to protect the calculation from differential power analysis attacks. As noted above, the Examiner agrees with the Applicant's arguments that there are no teachings in the prior art of the random number generator having a specified error limit of one-half word (see similar but not necessarily identical claim language). Since no teachings or motivation can be found of the random number generator having a specified error limit of one-half word, claims 1-6 and 8-12 are therefore novel and non-obvious.
12. Claims 14-19 would be allowable if the rejections under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action, were overcome.
